GREEN ENERGY GENERATION SYSTEM
BIOMASS WASTE IS TREASURE

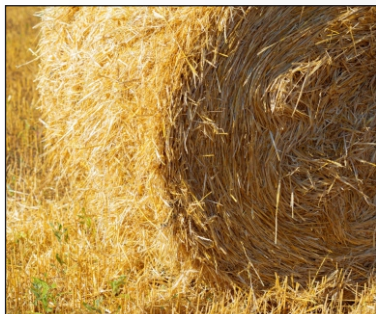

ABOUT US

Ecoverve Energy Private Limited is one of the fastest-growing start-ups in the renewable energy market and is among the few companies that provide comprehensive solutions and services to manufacturers. After years of research, we have identified the ideal method for producing pellets using **paddy straw**.

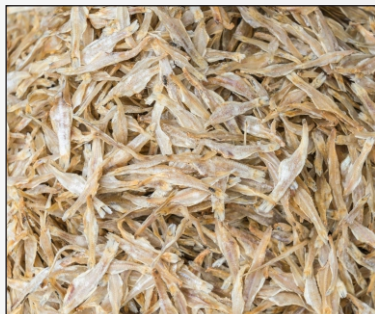

We also have a demonstration facility that showcases our efficient process for creating pellets from paddy straw to our clients.

Ecoverve Energy Private Limited is a fully funded start-up that has experienced remarkable growth. We have been recognized as a Great Place to Work for two consecutive years, 2023-2024 and 2024-2025.
